

The Pumps with Nine Lives

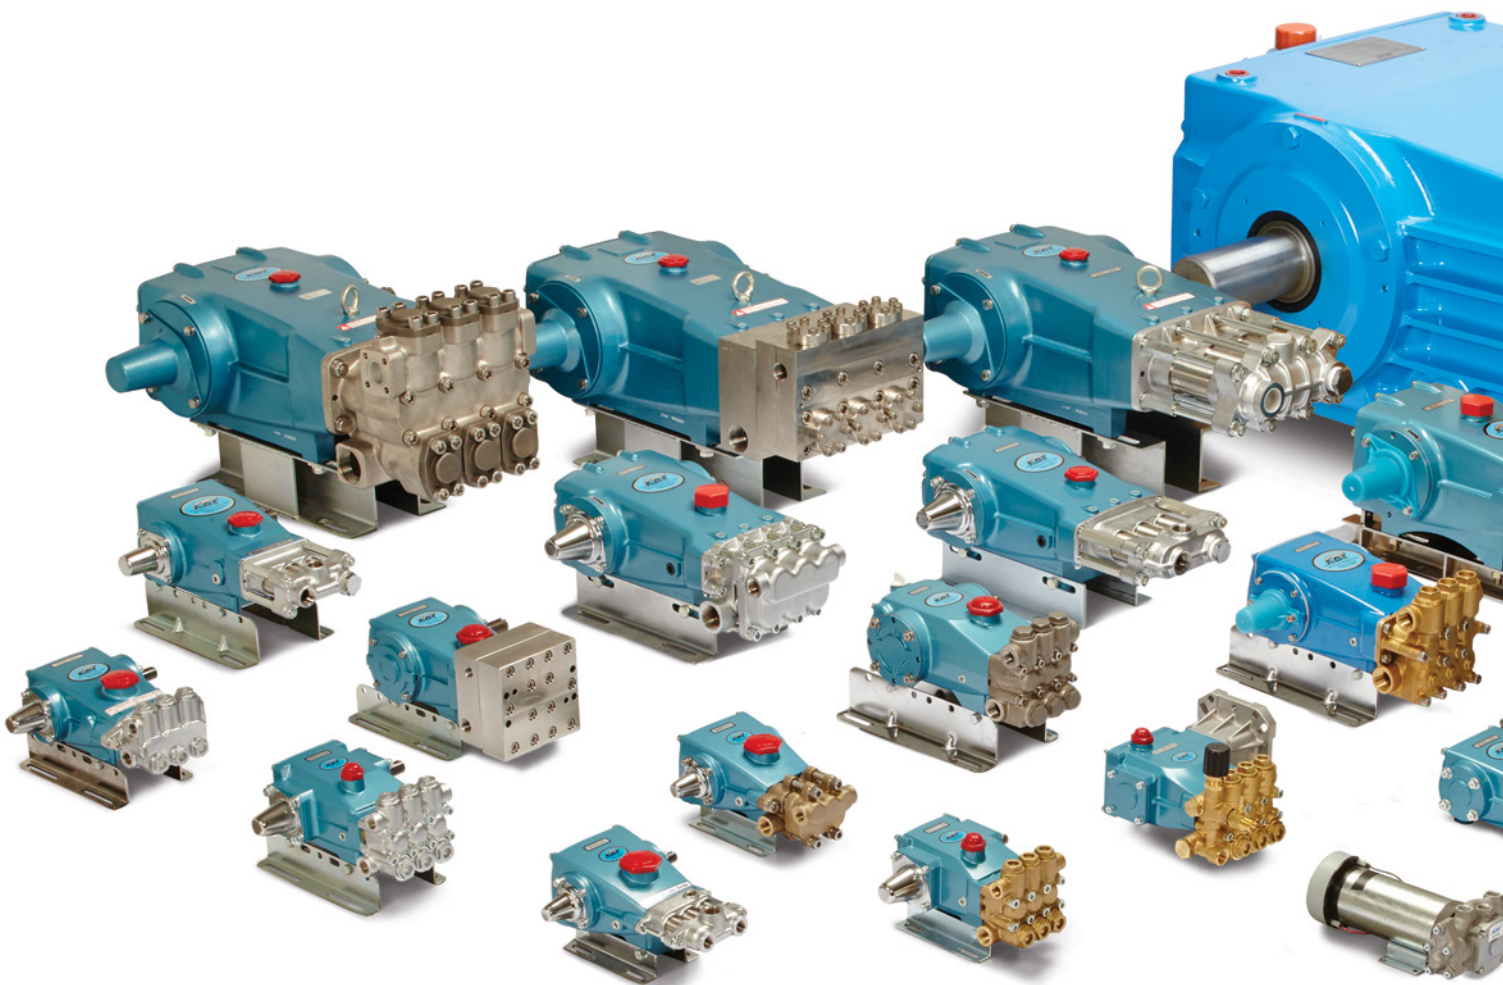

World Leader in
Triplex Reciprocating
High-Pressure Pumps

Product Quality, Reliability and Support You Expect

"It is the mission of Cat Pumps to manufacture the longest-lasting, most dependable high-pressure pumps possible and back them with outstanding service and availability from stock."

Bill Bruggeman
Founder and CEO

Thank you for your interest in Cat Pumps.

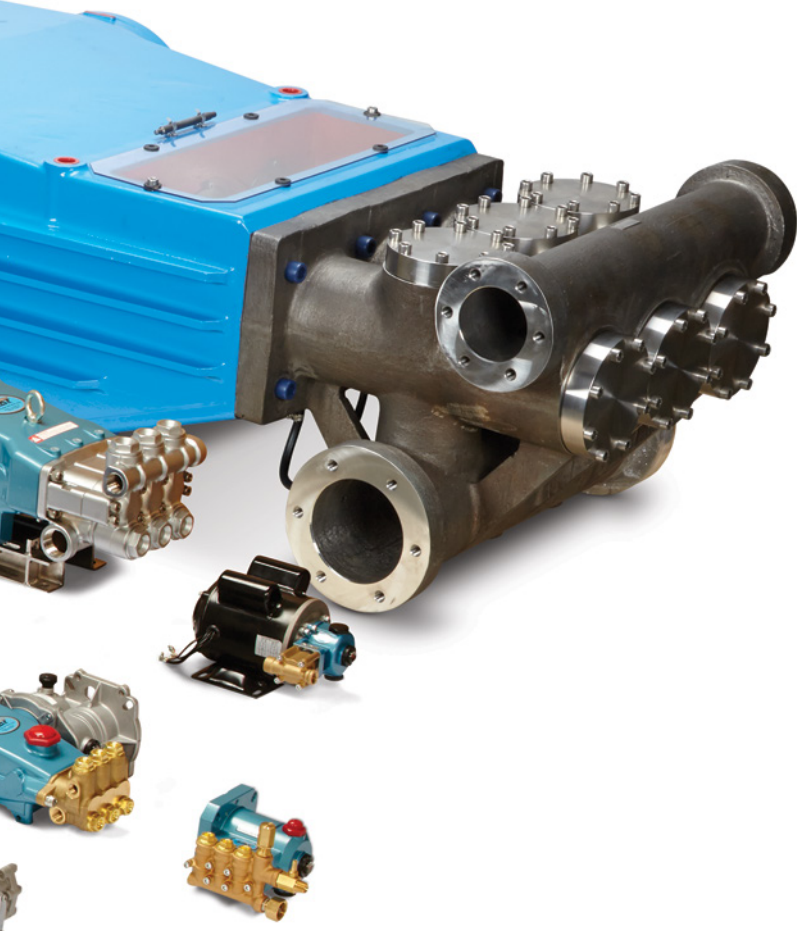

Founder & CEO William L. Bruggeman (right)
and President Steve Bruggeman (left)

Cat Pumps is a Minneapolis, Minnesota based company that has been family owned and operated for more than 48 years. My father, William L. Bruggeman, started the company in 1968, when he developed a new pump design that was far more dependable, efficient and much longer lasting than any available high pressure pump.

His idea was to manufacture the longest lasting, most dependable high pressure pumps possible and back them with outstanding service and availability from stock. This was the foundation of our business and has been our philosophy ever since, providing our customers with the best value in the industry.

Today, we provide more than 1000 pump models, all built to the highest quality standards possible and supported by the most experienced sales and service staff in the industry. I hope you will give Cat Pumps an opportunity to exceed your expectations.

Sincerely,
Steve Bruggeman
President

Cat Pumps produces over 1,000 pump models across a family of high-pressure plunger, piston and centrifugal pumps. Cat Pumps products are the preferred choice by customers looking for long-life and durability. Today, Cat Pumps is the world leader in triplex reciprocating high-pressure pumps.

Quality Our Customers Value

Cat Pumps earned the reputation of being the premier pump supplier in the car wash and pressure wash industries for one reason: our pumps outperformed and outlasted the competition. In fact, customers in these industries routinely reported our pumps achieved over 10 times the life of other pumps. Our founder took these words to heart when he selected “The Pump with Nine Lives” as our corporate trademark. Our commitment to quality is at the heart of Cat Pumps reputation and every well-designed system.

Over the life of the pump, Cat Pumps provides the highest value and lowest cost-of-ownership. Customers buy Cat Pumps because they realise that maximising production and uptime is good for business. Saving a few pounds on the price of a new pump does not cover the cost of downtime — and the impact on customer satisfaction.

Cat Pumps designs and builds products to the highest quality levels. We have made quality and performance the cornerstone of our business. We continuously build on our over 45 years of experience to produce the best pumps available today.

- Every last design detail is optimised for product life and performance. Specially formulated seals and high density, polished ceramic plungers typify the attention to design detail.
- Engineering excellence is a hallmark of Cat Pumps. Founded by an engineer and building products for highly technical customers, Cat Pumps is the most trusted name in high pressure pumps.

“Quality is never an accident; it is always the result of high intention, sincere effort, intelligent direction and skillful execution; it represents the wise choice of many alternatives”

– William A. Foster

Cat Pumps embraces a zero defects manufacturing philosophy and has done so since its beginning. Stringent controls result in highly repeatable processes — assuring the highest level of product reliability. Cat Pumps products are produced in ISO 9001 registered facilities. Cat Pumps commitment to quality is legendary within the industry and is one reason why customers remain loyal to Cat Pumps.

At Work in High-Pressure Applications Everywhere

Cat Pumps products are hard at work wherever high-pressure systems are in use. Customers rely on Cat Pumps products for demanding applications including:

- Pressure cleaning
- Water-blasting
- Reverse osmosis
- Vehicle wash
- Hydro-excavating
- Mist cooling
- Waste water re-injection
- Greenhouse misting
- Biodiesel processing
- Fire suppression misting
- Homogenization
- Hydrostatic testing
- Surface preparation

With an industry leading range of products and the reputation for the longest life, it is easy to understand why Cat Pumps products are the preferred choice for demanding applications everywhere.

Flow Range: 0.13 - 240 gpm / 0.49 - 908 lpm

Pressure Range: 100 - 10,000 psi / 7 - 689 bar

Manifold Material: 316SS, Duplex Stainless Steel, Brass, Nickel Aluminum Bronze, others by request

Typical Fluids: Water, methanol, diesel fuel, deionized water, hydraulic oil, CO₂, triethylene glycol, salt water, vegetable oil, vinegar, wine, and many more. Contact Cat Pumps for more information.

How We Serve Our Customers

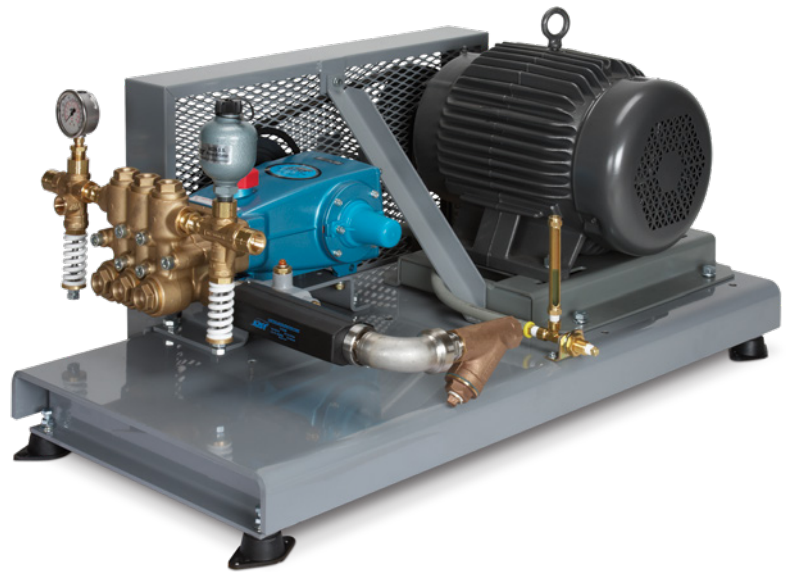

In addition to receiving the highest quality products available in the industry, Cat Pumps customers also enjoy the following benefits:

- 99.7% order fill rate, year after year, with world-class inventory management
- 95% of orders ship within 24 hours
- Hundreds of knowledgeable distributors worldwide stocking genuine Cat Pumps products
- Industry leading customer service
- Experienced staff on call to assist with inquiries, from designing power units to system troubleshooting
- Email sales@catpumps.co.uk for fast response to questions and requests

Engineered Pump Packages

Factory Designed,
Sourced, Built
and Tested

Purchasing a custom system from Cat Pumps offers more benefits than simply providing a high quality pumping system. By choosing Cat Pumps for your next custom system need, you save the time and expense of the following tasks:

- Initial Design
- Multiple Source Buying and Receiving
- Assembly
- Testing and Validation
- System Documentation
- Packaging

You also benefit from the experience and expertise of our technical staff to evaluate application information. We help you select system components to best fit the liquid being pumped, the work being performed and the duty-cycle.

With thousands of installations operating around the world, choose Cat Pumps for your next engineered pump package. We have the experience and know-how to help you get the job done. Contact Cat Pumps to start the quoting process — we will help you every step of the way.
